

# QColor™

020-FS RGB Remote Controller

ATG ELECTRONICS

QColor™ 020-FS RGB Remote Controller is an enhanced hardware controller to drive low-voltage RGB products, such as iSignage™ 36T, iLinear™ R60T, eCove™ T30T and WP27T, oSignage™ WP6T.

QColor™ 020-FS stores and plays 12 different pre-programmed color patterns. It adopts PWM (pulse width modulation) technology, at 315KHZ frequency; it enables you to manage the color pattern or speed over the remote (in standard selling package). You can also set the parameter on the controller by pressing button "MODE" or "SPEED".

Light your world  
Color your life!

## Part Numbers

Part Number	Description	Unit
HCD-00020-000000-FS	QColor 020-FS RGB Remote Controller, 12~24VDC, for iSignage 36T, iLinear R60T, eCove T30T/WP27T, oSignage WP6T	PCs

## Technical Specifications

Input Voltage	12VDC or 24VDC
Output Load Current	2A per line, 3 lines
Output Power	60W(12VDC), 120W(24VDC)
Operation Temperature	-10°C~50°C (14°F~122°F)
Dimension	L115mm*W58mm*H35mm (L4.53*W2.28*H1.38 inch)
Weight	80 g
Work Environment	Indoor dry environment
